

Therapeutic After School Program

From Quest Therapeutic Camps & JFCS Counseling Services

Quick Facts

- Program consists of three 10-week sessions (Spring, Fall and Winter) each school year
- Children and adolescents attend the after school program once a week from 4 - 6 p.m.
- Children are grouped based on age & ability
- Each child receives an individualized treatment plan
- Activity hour held once a week, to work with children in a naturalistic environment
- One hour of small-group therapy held once a week, to focus on individual goals & group dynamics
- Parent group meetings are held twice per session
- Parents receive both written and verbal feedback about their child's progress
- Parents are given free access to www.directiveparenting.com, an online tool developed by Quest Camps founder Dr. Robert Field

About Quest Camps

For more than 20 years, Quest Camps have provided innovative treatment programs for children aged 6-18 years old. Thousands of children have made dramatic improvements in behavioral, emotional and social functioning because of Quest's unique system that combines recreational activities, behavioral milieu and group psychotherapy.

JFCS Counseling Services partnered with Quest Therapeutic Camps to bring the program to Pittsburgh in Summer 2012.

The After School Program offers an opportunity for children to continue their progress and structure from the Summer Program throughout the school year. It can also benefit individuals who did not participate in the Summer Program. With the strains of homework and other activities, the program provides a time for children to strengthen the critical skills associated with emotional and social intelligence.
